

2 Must-Do Items: Happy Numbers Getting Started Guide

Make sure your first run with Happy Numbers is about learning math, not wrestling with technology!

1. Device Checklist

- Select the right browser - avoid glitches!

To run Happy Numbers we recommend:

- on iPad use Safari
- on PC or Mac use Google Chrome

- Enter your class number - save time!

On each device:

- go to HappyNumbers.com
- click "I'm a Student"
- enter your class number: **522 400**

The device will remember this number so students won't have to enter it again.
(Bonus: We've included a poster with your class number for easy reference).

- Test the audio feature - support non-readers!

After entering your class number:

- click the "sound check" link (below the list of student names)
- click on the  icon near "How many Cubes?"

If you hear the text read aloud, everything is good to go! Students will be able to click on any  icon within Happy Numbers exercises to hear it read aloud.

If you don't hear anything, ensure you are using the right browser and that it is the most up to date version (see explanation above). Also, check the volume and whether the device is in "silent mode".

2. Give Students Access

- Print and separate the student login cards (below). Laminate them for durability.
