April 10, 2012

Dear Holland Elementary School Families,

Ground has been moved, and fencing has been installed. The Holland Elementary School renovation project is officially underway.

The logistics of the renovation project will impact how we accept and dismiss students from the school.

The most immediate change you will notice is a new bus loop that will be in place tentatively on Wednesday, April 18, 2012. The new bus loop will be located at the front of the property where the outdoor classroom used to be. Once this date has been confirmed, I will notify the community by sending out a listserv email.

Students who ride the bus will be picked up and dropped off in the new bus loop area and enter the school using the K-1 door, which is located near the current music room.

Car riders will be dropped off in the morning at the main entrance doors and picked up in the afternoon using the doors by the modular units. The parent pick up line will be moved to the location of the main entrance doors.

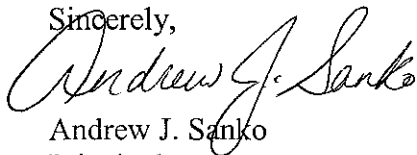

It would be helpful for everyone to ride the bus, thus decreasing the amount of traffic and congestion in the drop-off/pick up areas.

This information is also available on our website <http://www.crsd.org> along with a **color-coded map**. Continue to visit the Holland Elementary School website for renovation updates and changes.

Please call or email me with questions at 215-944-1500.

Thank you for your understanding.

Sincerely,

Andrew J. Sanko  
Principal
