December, 2021

Dear 11th Grade Parents:

In addition to our required health course, we offer an elective in 12th grade for health credit entitled "Accelerated Senior Seminar". Your child may wish to schedule this elective for the 2022-23 year. We feel special communication is appropriate.

Within a supervised educational setting, the senior seminar has been developed to enable mature 12th grade student to discuss current trends and difficulties in human relationships. This course encourages students to explore issues and attitudes in all areas of their lives.

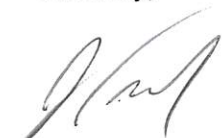

Throughout the course there is critical exploration of various social issues in human sexuality. Topics may include teenage pregnancy, sexual assault, sexually transmitted infections (including HIV/AIDS education), sexual orientation, contraception, and abstinence education. Students are encouraged to examine the multicultural, heterogeneous expression of values around these topics. The course also helps students integrate knowledge of self and others with better communication skills, increased ability to manage conflict, and increased insight in making decisions. Community resources, including speakers who are familiar with issues through their own experiences, are utilized to enhance learning and develop awareness of the complexity of the issues.

Because of the sensitive topics explored, parental permission is required to schedule this course. The following options are available:

1. Return the completed permission form to Kathy Moritz, guidance administrative assistance by emailing it to Mrs. Moritz at kmoritz@crsd.org.
2. Have your student turn in their completed permission slip to the Counseling Center from 7:00-1:30pm by **Friday, January 28, 2022.**

The permission form below must be returned to the Counseling Center no later than **Friday, January 28, 2022.**

Sincerely,

Jason Traczykiewicz
Principal

Vanessa Robtison
